Overview

Bumper Pad is furniture hardware used in cabinet and furniture manufacturing, selected by load, material, finish, and fit. This page summarizes how to specify it for volume furniture and cabinet manufacturing, including the dimensions and options that matter most to buyers.

Industry Data

Use these product signals to compare fit, specification risk, and sourcing options before requesting samples or bulk pricing.

- **Function:** Push-to-open release Confirm the exact value on the order datasheet before production.
- **Holding Force:** 4-6 kgf Confirm the exact value on the order datasheet before production.
- **Mounting Type:** Surface mount Confirm the exact value on the order datasheet before production.
- **Body Size:** 45 x 17 x 14 mm Confirm the exact value on the order datasheet before production.
- **Material:** Silicone / rubber Confirm the exact value on the order datasheet before production.
- **Material options:** Stainless Steel, Carbon Steel, Zinc Alloy, Aluminum and Brass Choose material by strength, corrosion exposure, and target price.
- **Finish options:** Zinc Plated, Black Nickel, Bronze, Antique Brass and Copper Confirm finish samples when color matching matters.
- **Application fit:** Bathroom Vanities, Wardrobe Cabinets, Closet Systems and Bedroom Furniture Match the product to the furniture use case, not only to the part name.

Bumper Pad

Key Specifications

Function	Push-to-open release
Holding Force	4-6 kgf
Mounting Type	Surface mount
Body Size	45 x 17 x 14 mm
Material	Silicone / rubber
Adjustment	Slotted mounting holes

Specifications are configurable for OEM/ODM orders. Exact values are confirmed on the datasheet for your order.

How to Choose

- Load and usage requirement
- Material for the environment and price point
- Finish for appearance and corrosion resistance
- Mounting and dimensional fit

Material Options

Choose the material for the load, corrosion exposure, and target price of the program.

Application Fit

Bathroom Vanities

For this application, bumper pad is specified for humidity and corrosion resistance, compact drawers, and easy maintenance.

Wardrobe Cabinets

For this application, bumper pad is specified for quiet operation, smooth movement, and space-saving storage.

Closet Systems

For this application, bumper pad is specified for the typical load, environment, and usage of this application.

Bedroom Furniture

For this application, bumper pad is specified for the typical load, environment, and usage of this application.

Living Room Furniture

For this application, bumper pad is specified for the typical load, environment, and usage of this application.

Office Furniture

For this application, bumper pad is specified for high-frequency use, file-drawer loads, and central locking.
