Overview

Card Holder Pull is decorative cabinet hardware fixed to doors and drawer fronts, specified by center-to-center hole spacing and finish so it matches the kitchen or furniture range. The notes below cover construction, selection factors, sizes, materials, finishes, application fit, and installation for OEM production.

Industry Data

Use these product signals to compare fit, specification risk, and sourcing options before requesting samples or bulk pricing.

- **Diameter / Shape:** 32 mm square Confirm the exact value on the order datasheet before production.
- **Overall Length:** 25-38 mm Confirm the exact value on the order datasheet before production.
- **Projection:** 24 mm Confirm the exact value on the order datasheet before production.
- **Grip / Face Width:** 14 mm Confirm the exact value on the order datasheet before production.
- **Screw:** 8-32 machine screw Confirm the exact value on the order datasheet before production.
- **Material options:** Stainless Steel, Carbon Steel, Zinc Alloy, Aluminum and Brass Choose material by strength, corrosion exposure, and target price.
- **Finish options:** White, Satin Brass, Anodized Aluminum, Satin Nickel and Flat Black Confirm finish samples when color matching matters.
- **Application fit:** Retail Display Fixtures, Commercial Display Cabinets, Store Fixtures and Restaurant Furniture Match the product to the furniture use case, not only to the part name.

Card Holder Pull

Key Specifications

Diameter / Shape	32 mm square
Overall Length	25-38 mm
Projection	24 mm
Grip / Face Width	14 mm
Screw	8-32 machine screw
Base Material	Aluminum
Finish Options	Matte black / brushed nickel / brass

Specifications are configurable for OEM/ODM orders. Exact values are confirmed on the datasheet for your order.

How to Choose

- Center-to-center hole spacing (the critical fit dimension)
- Overall length and projection from the door
- Knob vs pull, and matching knobs to pulls across a kitchen
- Finish matched to faucets and appliances
- Cabinet style (modern, transitional, traditional)
- Grip comfort and edge profile
- Screw length for the door/drawer thickness
- Replacement hole spacing when retrofitting

Material Options

Zinc alloy and solid brass are the common bodies; stainless steel suits commercial use. Solid metal feels more premium and holds plated finishes well.

- [Aluminum Card Holder Pull](#)
- [Brass Card Holder Pull](#)
- [Copper Card Holder Pull](#)

Finish Options

Top-demand finishes are matte black, brushed nickel, champagne bronze, brushed gold, gold, oil-rubbed bronze, and stainless steel. Keep one finish family across knobs and pulls so a kitchen reads consistently.

Installation Notes

Drill the door or drawer front to the center-to-center spacing using a template, then fix with machine screws (8-32) sized to the panel thickness. For retrofits, match the existing hole spacing or use an adjustable backplate.

Buying Notes for OEM Orders

For OEM and hospitality orders, standardize hole spacings and a single finish family, and offer matching knobs and pulls. Custom finishes and branding raise MOQ; confirm on the quote.
