- **Cup Depth:** 13 mm Confirm the exact value on the order datasheet before production.
- **Opening Angle:** 105 deg Confirm the exact value on the order datasheet before production.
- **Overlay / Crank:** Full overlay Confirm the exact value on the order datasheet before production.
- **Door Thickness:** 14-20 mm Confirm the exact value on the order datasheet before production.
- **Material options:** Stainless Steel, Carbon Steel, Zinc Alloy, Aluminum and Brass Choose material by strength, corrosion exposure, and target price.
- **Finish options:** Pewter, Flat Black, Satin Chrome, Chrome and Gray Confirm finish samples when color matching matters.
- **Application fit:** Kitchen Cabinets, Frameless Cabinets, Custom Cabinets and Aluminum Frame Cabinet Doors Match the product to the furniture use case, not only to the part name.

Key Specifications

Cup Diameter	35 mm
Cup Depth	13 mm
Opening Angle	105 deg
Overlay / Crank	Full overlay
Door Thickness	14-20 mm
Mounting Pattern	48/6 mm cup screw pattern
Closing Function	Self closing

Specifications are configurable for OEM/ODM orders. Exact values are confirmed on the datasheet for your order.

How to Choose

- Cup diameter (35mm is the furniture-industry standard; 26mm for thin doors)
- Cup depth and the required boring pattern
- Opening angle (95°–110° for most doors, wide-angle for blind corners)
- Overlay type: full overlay, half overlay, or inset
- Face-frame vs frameless (European) cabinet construction
- Door thickness and material
- Soft-close or self-closing requirement
- Mounting plate type and clip-on vs screw-on attachment

Material Options

Cold-rolled steel arms with nickel plating are standard for value, while stainless steel suits humid kitchens and bathrooms. Cup and arm gauge drive the cycle life and sag resistance.

Finish Options

Hinges are usually nickel-plated and hidden inside the cabinet, so finish is about corrosion resistance rather than appearance. Specify a heavier plating or stainless steel for high-humidity programs.

Installation Notes

Bore the 35mm cup, screw the hinge boss to the door, fix the mounting plate to the cabinet side at the correct height, then clip the arm to the plate. Use the three adjustment screws to align overlay, height, and depth.

Buying Notes for OEM Orders

For OEM cabinet lines, lock the cup size, opening angle, overlay, and soft-close type, then standardize the mounting plate height across the range to keep boring patterns consistent.
