Key Specifications

Function	Magnetic hold
Holding Force	4-6 kgf
Mounting Type	Surface mount
Body Size	Adjustable strike plate
Material	Zinc alloy body
Adjustment	Fixed position

Specifications are configurable for OEM/ODM orders. Exact values are confirmed on the datasheet for your order.

How to Choose

- Holding force needed for the door size
- Magnetic, roller, push, or touch-latch type
- Surface or concealed mounting
- Adjustment for door alignment

Material Options

Plastic bodies with steel strike plates are standard; stronger magnets for larger doors.

Application Fit

Heavy Duty Drawers

For this application, friction catch is specified for the typical load, environment, and usage of this application.

File Cabinets

For this application, friction catch is specified for full-extension access and load-rated, lockable operation.

Tool Cabinets

For this application, friction catch is specified for heavy loads, ball-bearing movement, and locking under vibration.

Pantry Cabinets

For this application, friction catch is specified for the typical load, environment, and usage of this application.

Corner Cabinets

For this application, friction catch is specified for the typical load, environment, and usage of this application.

Wall Cabinets

For this application, friction catch is specified for the typical load, environment, and usage of this application.
