DRAWER SLIDES AND DRAWER SYSTEMS

Drawer Slide is a drawer slide that carries the drawer on ball bearings or rollers, providing smooth, load-rated extension and consistent drawer alignment for cabinet and furniture manufacturing. It is available for OEM bulk supply with samples, datasheets, and installation drawings on request.

Overview

Drawer Slide is a drawer slide that carries the drawer on ball bearings or rollers, providing smooth, load-rated extension and consistent drawer alignment for cabinet and furniture manufacturing. This page summarizes how to specify it for volume furniture and cabinet manufacturing, including the dimensions and options that matter most to buyers.

Industry Data

Use these product signals to compare fit, specification risk, and sourcing options before requesting samples or bulk pricing.

- **Nominal Length:** 18 in Confirm the exact value on the order datasheet before production.
- **Extension Type:** Full extension Confirm the exact value on the order datasheet before production.
- **Load Rating:** 25 kg Confirm the exact value on the order datasheet before production.
- **Mounting Clearance:** 12.7 mm (1/2 in) per side Confirm the exact value on the order datasheet before production.
- **Member Height:** 45 mm Confirm the exact value on the order datasheet before production.
- **Material options:** Stainless Steel, Carbon Steel, Zinc Alloy, Aluminum and Brass Choose material by strength, corrosion exposure, and target price.
- **Finish options:** Pewter, Aged Brass, Satin Nickel, Brushed Brass and Anodized Aluminum Confirm finish samples when color matching matters.
- **Application fit:** Kitchen Cabinets, Dressers, Office Furniture and File Cabinets Match the product to the furniture use case, not only to the part name.

Drawer Slide

Key Specifications

Nominal Length	18 in
Extension Type	Full extension
Load Rating	25 kg
Mounting Clearance	12.7 mm (1/2 in) per side
Member Height	45 mm
Motion Feature	Lock-in / lock-out
Cycle Test	50,000 cycles

Specifications are configurable for OEM/ODM orders. Exact values are confirmed on the datasheet for your order.

How to Choose

- Slide length matched to the cabinet/drawer depth
- Extension type: full extension, over-travel, or partial
- Mounting type: side mount, undermount, bottom mount, or center mount
- Load capacity for the drawer contents and usage
- Side clearance available in the cabinet opening
- Soft-close, push-to-open, or lockable function
- Ball-bearing vs roller movement and cycle life
- Suitable furniture type and frequency of use

Material Options

Cold-rolled steel with ball bearings is standard; zinc plating resists corrosion indoors, and stainless steel suits damp or outdoor-adjacent use. Steel gauge and bearing count set the load rating.

- [Carbon Steel Drawer Slide](#)
- [Zinc Alloy Drawer Slide](#)
- [Aluminum Drawer Slide](#)
- [Brass Drawer Slide](#)
- [Copper Drawer Slide](#)

Finish Options

Zinc-plated is the default; black and stainless options match exposed industrial drawers. Finish mainly affects corrosion resistance since most slides are hidden.

Application Fit

[Kitchen Cabinets](#)

For this application, drawer slide is specified for daily use, soft-close motion, moisture resistance, and fast, repeatable installation on the line.

[Dressers](#)

For this application, drawer slide is specified for smooth drawer travel and quiet, aligned operation.

[Office Furniture](#)

For this application, drawer slide is specified for high-frequency use, file-drawer loads, and central locking.

[File Cabinets](#)

For this application, drawer slide is specified for full-extension access and load-rated, lockable operation.

[Truck and Tool Storage](#)

For this application, drawer slide is specified for the typical load, environment, and usage of this application.

[Face Frame Cabinets](#)

For this application, drawer slide is specified for the typical load, environment, and usage of this application.

Installation Notes

Mount the cabinet member level and square, fix the drawer member to the drawer side at the matching height, then engage and test full travel. Verify clearance and that soft-close engages before locking the pattern.

Buying Notes for OEM Orders

For OEM production, standardize on a small set of slide lengths and one load class per drawer size, and confirm soft-close behavior on a sample batch.

Related Questions

These questions are pulled into the product page as visible Q&A content, not only as plain FAQ links.

What is Drawer Slides and Drawer Systems?

Drawer Slides and Drawer Systems carries a drawer on ball bearings or rollers, giving smooth, load-rated extension and consistent alignment. It is specified by length, extension type, mounting type, and load capacity.

[Read the full Drawer Slide FAQ →](#)

What is Undermount Drawer Slide?

Undermount Drawer Slide carries a drawer on ball bearings or rollers, giving smooth, load-rated extension and consistent alignment. It is specified by length, extension type, mounting type, and load capacity.

[Read the full Undermount Drawer Slide FAQ →](#)

What is Heavy Duty Drawer Slide?

Heavy Duty Drawer Slide carries a drawer on ball bearings or rollers, giving smooth, load-rated extension and consistent alignment. It is specified by length, extension type, mounting type, and load capacity.

What is Soft Close Drawer Slide?

Soft Close Drawer Slide carries a drawer on ball bearings or rollers, giving smooth, load-rated extension and consistent alignment. It is specified by length, extension type, mounting type, and load capacity.

[Read the full Soft Close Drawer Slide FAQ →](#)

What is Side Mount Drawer Slide?

Side Mount Drawer Slide carries a drawer on ball bearings or rollers, giving smooth, load-rated extension and consistent alignment. It is specified by length, extension type, mounting type, and load capacity.

[Read the full Side Mount Drawer Slide FAQ →](#)

What is Full Extension Drawer Slide?

Full Extension Drawer Slide carries a drawer on ball bearings or rollers, giving smooth, load-rated extension and consistent alignment. It is specified by length, extension type, mounting type, and load capacity.
