DRAWER SLIDES AND DRAWER SYSTEMS

Lockable Drawer Slide is a drawer slide that carries the drawer on ball bearings or rollers, providing smooth, load-rated extension and consistent drawer alignment for cabinet and furniture manufacturing. It is available for OEM bulk supply with samples, datasheets, and installation drawings on request.

Overview

Lockable Drawer Slide is a drawer slide that carries the drawer on ball bearings or rollers, providing smooth, load-rated extension and consistent drawer alignment for cabinet and furniture manufacturing. The notes below cover construction, selection factors, sizes, materials, finishes, application fit, and installation for OEM production.

Industry Data

Use these product signals to compare fit, specification risk, and sourcing options before requesting samples or bulk pricing.

- **Nominal Length:** 28 in Confirm the exact value on the order datasheet before production.
- **Extension Type:** Full extension Confirm the exact value on the order datasheet before production.
- **Load Rating:** 35 kg Confirm the exact value on the order datasheet before production.
- **Mounting Clearance:** 12.7 mm (1/2 in) per side Confirm the exact value on the order datasheet before production.
- **Member Height:** 53 mm Confirm the exact value on the order datasheet before production.
- **Material options:** Stainless Steel, Carbon Steel, Zinc Alloy, Aluminum and Brass Choose material by strength, corrosion exposure, and target price.
- **Finish options:** Flat Black, Black Nickel, Matte Black, Brushed Brass and Gray Confirm finish samples when color matching matters.
- **Application fit:** File Cabinets, Tool Cabinets, Office Furniture and Handleless Cabinets Match the product to the furniture use case, not only to the part name.

Lockable Drawer Slide

Key Specifications

Nominal Length	28 in
Extension Type	Full extension
Load Rating	35 kg
Mounting Clearance	12.7 mm (1/2 in) per side
Member Height	53 mm
Motion Feature	Lock-in / lock-out
Cycle Test	80,000 cycles

Specifications are configurable for OEM/ODM orders. Exact values are confirmed on the datasheet for your order.

How to Choose

- Slide length matched to the cabinet/drawer depth
- Extension type: full extension, over-travel, or partial
- Mounting type: side mount, undermount, bottom mount, or center mount
- Load capacity for the drawer contents and usage
- Side clearance available in the cabinet opening
- Soft-close, push-to-open, or lockable function
- Ball-bearing vs roller movement and cycle life
- Suitable furniture type and frequency of use

Material Options

Cold-rolled steel with ball bearings is standard; zinc plating resists corrosion indoors, and stainless steel suits damp or outdoor-adjacent use. Steel gauge and bearing count set the load rating.

- [Carbon Steel Lockable Drawer Slide](#)
- [Zinc Alloy Lockable Drawer Slide](#)
- [Aluminum Lockable Drawer Slide](#)
- [Brass Lockable Drawer Slide](#)
- [Copper Lockable Drawer Slide](#)

Finish Options

Zinc-plated is the default; black and stainless options match exposed industrial drawers. Finish mainly affects corrosion resistance since most slides are hidden.

Application Fit

[File Cabinets](#)

For this application, lockable drawer slide is specified for full-extension access and load-rated, lockable operation.

[Tool Cabinets](#)

For this application, lockable drawer slide is specified for heavy loads, ball-bearing movement, and locking under vibration.

[Office Furniture](#)

For this application, lockable drawer slide is specified for high-frequency use, file-drawer loads, and central locking.

[Handleless Cabinets](#)

For this application, lockable drawer slide is specified for the typical load, environment, and usage of this application.

[Soft Close Cabinets](#)

For this application, lockable drawer slide is specified for the typical load, environment, and usage of this application.

[Push To Open Cabinets](#)

For this application, lockable drawer slide is specified for the typical load, environment, and usage of this application.

Installation Notes

Mount the cabinet member level and square, fix the drawer member to the drawer side at the matching height, then engage and test full travel. Verify clearance and that soft-close engages before locking the pattern.

Buying Notes for OEM Orders

For OEM production, standardize on a small set of slide lengths and one load class per drawer size, and confirm soft-close behavior on a sample batch.

Related Questions

These questions are pulled into the product page as visible Q&A content, not only as plain FAQ links.

What is Drawer Slides and Drawer Systems?

Drawer Slides and Drawer Systems carries a drawer on ball bearings or rollers, giving smooth, load-rated extension and consistent alignment. It is specified by length, extension type, mounting type, and load capacity.

[Read the full Drawer Slide FAQ →](#)

What is Undermount Drawer Slide?

Undermount Drawer Slide carries a drawer on ball bearings or rollers, giving smooth, load-rated extension and consistent alignment. It is specified by length, extension type, mounting type, and load capacity.
