Overview

Cabinet Door Frame Profile finishes and protects panel edges with a color-matched profile for a clean, durable furniture edge. The notes below cover construction, selection factors, sizes, materials, finishes, application fit, and installation for OEM production.

Industry Data

Use these product signals to compare fit, specification risk, and sourcing options before requesting samples or bulk pricing.

- **Panel / Band Width:** 16 mm Confirm the exact value on the order datasheet before production.
- **Thickness:** 0.4 mm Confirm the exact value on the order datasheet before production.
- **Length / Roll:** 100 m roll Confirm the exact value on the order datasheet before production.
- **Material:** PVC Confirm the exact value on the order datasheet before production.
- **Fixing Method:** Clip-on profile Confirm the exact value on the order datasheet before production.
- **Material options:** Stainless Steel, Carbon Steel, Zinc Alloy, Aluminum and Brass Choose material by strength, corrosion exposure, and target price.
- **Finish options:** Zinc Plated, Rose Gold, White, Flat Black and Polished Stainless Steel Confirm finish samples when color matching matters.
- **Application fit:** MDF Cabinets, Plywood Cabinets, Solid Wood Furniture and Glass Display Cabinets Match the product to the furniture use case, not only to the part name.

Cabinet Door Frame Profile

Key Specifications

Panel / Band Width	16 mm
Thickness	0.4 mm
Length / Roll	100 m roll
Material	PVC
Fixing Method	Clip-on profile
Finish Match	High gloss

Specifications are configurable for OEM/ODM orders. Exact values are confirmed on the datasheet for your order.

How to Choose

- Panel thickness and edge profile
- Material match to the panel
- Adhesive or pre-glued type
- Color and finish match

Material Options

PVC, ABS, and melamine bandings to match the panel surface.
