FURNITURE CONNECTORS AND KNOCK DOWN FITTINGS

Cabinet Connector is a knock-down furniture connector that joins panels for flat-pack and RTA furniture, giving a strong, tool-light joint with a consistent drilling pattern. It is available for OEM bulk supply with samples, datasheets, and installation drawings on request.

Overview

Cabinet Connector is a knock-down furniture connector that joins panels for flat-pack and RTA furniture, giving a strong, tool-light joint with a consistent drilling pattern. The notes below cover construction, selection factors, sizes, materials, finishes, application fit, and installation for OEM production.

Industry Data

Use these product signals to compare fit, specification risk, and sourcing options before requesting samples or bulk pricing.

- **Panel Thickness:** 16-25 mm Confirm the exact value on the order datasheet before production.
- **Housing / Bore:** 15 mm cam housing Confirm the exact value on the order datasheet before production.
- **Bolt / Dowel Size:** 10 x 40 mm dowel Confirm the exact value on the order datasheet before production.
- **Joint Type:** Right-angle cabinet joint Confirm the exact value on the order datasheet before production.
- **Material:** Steel bracket Confirm the exact value on the order datasheet before production.
- **Material options:** Stainless Steel, Carbon Steel, Zinc Alloy, Aluminum and Brass Choose material by strength, corrosion exposure, and target price.
- **Finish options:** Oil Rubbed Bronze, White, Rose Gold, Matte Black and Powder Coated Confirm finish samples when color matching matters.
- **Application fit:** Handleless Cabinets, Soft Close Cabinets, Push To Open Cabinets and Heavy Duty Drawers Match the product to the furniture use case, not only to the part name.

Cabinet Connector

Key Specifications

Panel Thickness	16-25 mm
Housing / Bore	15 mm cam housing
Bolt / Dowel Size	10 x 40 mm dowel
Joint Type	Right-angle cabinet joint
Material	Steel bracket
Assembly Tool	Pozi screwdriver

Specifications are configurable for OEM/ODM orders. Exact values are confirmed on the datasheet for your order.

How to Choose

- Knock-down (KD) assembly and whether it must be re-openable
- Cam lock + dowel systems vs bolt-and-barrel-nut joints
- Panel thickness and the matching drilling pattern
- Drilling diameter and depth for the cam housing and dowel
- Joint strength and how many times it will be assembled
- Flat-pack / RTA packaging and tool-free or single-tool assembly

Material Options

Zinc die-cast cams with steel bolts give strong, repeatable joints; nylon dowels and housings suit lighter RTA furniture. Metal cams handle repeated assembly better.

- [Brass Cabinet Connector](#)
- [Copper Cabinet Connector](#)

Finish Options

Connectors are hidden, so zinc plating for corrosion resistance is the norm; nickel or brown housings can blend with panel edges where visible.

Application Fit

[Handleless Cabinets](#)

For this application, cabinet connector is specified for the typical load, environment, and usage of this application.

[Soft Close Cabinets](#)

For this application, cabinet connector is specified for the typical load, environment, and usage of this application.

[Push To Open Cabinets](#)

For this application, cabinet connector is specified for the typical load, environment, and usage of this application.

[Heavy Duty Drawers](#)

For this application, cabinet connector is specified for the typical load, environment, and usage of this application.

[File Cabinets](#)

For this application, cabinet connector is specified for full-extension access and load-rated, lockable operation.

[Tool Cabinets](#)

For this application, cabinet connector is specified for heavy loads, ball-bearing movement, and locking under vibration.

Installation Notes

Bore the cam housing and dowel holes to the system pattern, press in the dowels, insert the cam bolt, drop the cam, and turn a quarter-to-half turn to draw the joint tight. Drilling accuracy is what makes the joint flush.

Buying Notes for OEM Orders

For flat-pack and RTA production, standardize one cam system and drilling pattern across SKUs, and supply pre-counted hardware packs per carton.
