Overview

Central Locking System is a furniture lock that secures cabinet doors, drawers, or sliding panels, available keyed-alike or keyed-different for fleet furniture. The notes below cover construction, selection factors, sizes, materials, finishes, application fit, and installation for OEM production.

Industry Data

Use these product signals to compare fit, specification risk, and sourcing options before requesting samples or bulk pricing.

- **Lock Type:** Drawer lock Confirm the exact value on the order datasheet before production.
- **Cylinder Length:** 16 mm Confirm the exact value on the order datasheet before production.
- **Panel Thickness:** 16-22 mm Confirm the exact value on the order datasheet before production.
- **Cam Throw / Reach:** 22 mm straight cam Confirm the exact value on the order datasheet before production.
- **Keying Option:** Master key system available Confirm the exact value on the order datasheet before production.
- **Material options:** Stainless Steel, Carbon Steel, Zinc Alloy, Aluminum and Brass Choose material by strength, corrosion exposure, and target price.
- **Finish options:** Copper, Oil Rubbed Bronze, Bronze, Flat Black and Polished Stainless Steel Confirm finish samples when color matching matters.
- **Application fit:** Bathroom Vanities, Wardrobe Cabinets, Closet Systems and Bedroom Furniture Match the product to the furniture use case, not only to the part name.

Central Locking System

Key Specifications

Lock Type	Drawer lock
Cylinder Length	16 mm
Panel Thickness	16-22 mm
Cam Throw / Reach	22 mm straight cam
Keying Option	Master key system available
Finish	Chrome
Supplied With	Cam, nut, and rosette

Specifications are configurable for OEM/ODM orders. Exact values are confirmed on the datasheet for your order.

How to Choose

- Lock type: cam lock, drawer lock, sliding-door lock, or central locking
- Cabinet material and panel thickness
- Keyed-alike vs keyed-different for fleets
- Cylinder length and cam reach
- Security level and frequency of use

Material Options

Zinc die-cast bodies with brass cylinders are standard; choose higher-security cylinders for offices and lockers.

Application Fit

Bathroom Vanities

For this application, central locking system is specified for humidity and corrosion resistance, compact drawers, and easy maintenance.

Wardrobe Cabinets

For this application, central locking system is specified for quiet operation, smooth movement, and space-saving storage.

Closet Systems

For this application, central locking system is specified for the typical load, environment, and usage of this application.

Bedroom Furniture

For this application, central locking system is specified for the typical load, environment, and usage of this application.

Living Room Furniture

For this application, central locking system is specified for the typical load, environment, and usage of this application.

Office Furniture

For this application, central locking system is specified for high-frequency use, file-drawer loads, and central locking.

Buying Notes for OEM Orders

For office and institutional furniture, decide keyed-alike vs keyed-different early and order master-key sets where needed.

Related Questions

These questions are pulled into the product page as visible Q&A content, not only as plain FAQ links.

What is Cabinet Lock?

Cabinet Lock is furniture hardware used in cabinet and furniture manufacturing. It is selected by load rating, material, finish, and the furniture type it is installed in. We supply it for OEM/ODM bulk production with samples and datasheets on request.
