Overview

Child Safety Cabinet Lock is a furniture lock that secures cabinet doors, drawers, or sliding panels, available keyed-alike or keyed-different for fleet furniture. The notes below cover construction, selection factors, sizes, materials, finishes, application fit, and installation for OEM production.

Industry Data

Use these product signals to compare fit, specification risk, and sourcing options before requesting samples or bulk pricing.

- **Lock Type:** Cam lock Confirm the exact value on the order datasheet before production.
- **Cylinder Length:** 30 mm Confirm the exact value on the order datasheet before production.
- **Panel Thickness:** 16-22 mm Confirm the exact value on the order datasheet before production.
- **Cam Throw / Reach:** 90 deg cam rotation Confirm the exact value on the order datasheet before production.
- **Keying Option:** Keyed different Confirm the exact value on the order datasheet before production.
- **Material options:** Stainless Steel, Carbon Steel, Zinc Alloy, Aluminum and Brass Choose material by strength, corrosion exposure, and target price.
- **Finish options:** Copper, Bronze, Gray, Brushed Gold and Brushed Brass Confirm finish samples when color matching matters.
- **Application fit:** RV and Camper Furniture, Truck and Tool Storage, Face Frame Cabinets and Frameless Cabinets Match the product to the furniture use case, not only to the part name.

Child Safety Cabinet Lock

Key Specifications

Lock Type	Cam lock
Cylinder Length	30 mm
Panel Thickness	16-22 mm
Cam Throw / Reach	90 deg cam rotation
Keying Option	Keyed different
Finish	Chrome
Supplied With	Battery box and override key

Specifications are configurable for OEM/ODM orders. Exact values are confirmed on the datasheet for your order.

How to Choose

- Lock type: cam lock, drawer lock, sliding-door lock, or central locking
- Cabinet material and panel thickness
- Keyed-alike vs keyed-different for fleets
- Cylinder length and cam reach
- Security level and frequency of use

Material Options

Zinc die-cast bodies with brass cylinders are standard; choose higher-security cylinders for offices and lockers.
