Overview

Shelf Support is an adjustable shelf support that seats into a line-bored hole to carry cabinet, bookcase, or glass shelves at the height you choose. This page summarizes how to specify it for volume furniture and cabinet manufacturing, including the dimensions and options that matter most to buyers.

Industry Data

Use these product signals to compare fit, specification risk, and sourcing options before requesting samples or bulk pricing.

- **Cabinet Width:** 450 mm Confirm the exact value on the order datasheet before production.
- **Load Capacity:** 10 kg Confirm the exact value on the order datasheet before production.
- **Runner / Motion:** Full-extension runner Confirm the exact value on the order datasheet before production.
- **Basket / Frame Size:** Pantry frame 1700 mm Confirm the exact value on the order datasheet before production.
- **Mounting:** Base cabinet side mount Confirm the exact value on the order datasheet before production.
- **Material options:** Stainless Steel, Carbon Steel, Zinc Alloy, Aluminum and Brass Choose material by strength, corrosion exposure, and target price.
- **Finish options:** Satin Brass, Satin Chrome, Brushed Stainless Steel, Polished Brass and Bronze Confirm finish samples when color matching matters.
- **Application fit:** Kitchen Cabinets, Bookcases, Closet Systems and Wardrobe Cabinets Match the product to the furniture use case, not only to the part name.

Shelf Support

Key Specifications

Cabinet Width	450 mm
Load Capacity	10 kg
Runner / Motion	Full-extension runner
Basket / Frame Size	Pantry frame 1700 mm
Mounting	Base cabinet side mount
Material / Finish	Powder-coated steel
Door Compatibility	Hinged door cabinet

Specifications are configurable for OEM/ODM orders. Exact values are confirmed on the datasheet for your order.

How to Choose

- Shelf pin diameter and the matching drilling hole size (5mm is standard, 1/4" common in the US)
- Shelf thickness and material (wood, melamine, or glass)
- Load per shelf and number of support points
- Adjustable line-boring vs fixed positions
- Concealed vs visible support style
- Glass shelf support with a cushioned or clamped seat
- Cabinet, bookcase, or closet application

Material Options

Nickel-plated steel and zinc supports carry the most load; clear polycarbonate suits glass and display work where the support should disappear.

- [Carbon Steel Shelf Support](#)
- [Zinc Alloy Shelf Support](#)
- [Aluminum Shelf Support](#)
- [Brass Shelf Support](#)
- [Copper Shelf Support](#)

Finish Options

Nickel and clear are the usual choices. For glass and display cabinets, a clear or chrome support keeps the look clean.

Application Fit

[Kitchen Cabinets](#)

For this application, shelf support is specified for daily use, soft-close motion, moisture resistance, and fast, repeatable installation on the line.

[Bookcases](#)

For this application, shelf support is specified for the typical load, environment, and usage of this application.

[Closet Systems](#)

For this application, shelf support is specified for the typical load, environment, and usage of this application.

[Wardrobe Cabinets](#)

For this application, shelf support is specified for quiet operation, smooth movement, and space-saving storage.

[Commercial Display Cabinets](#)

For this application, shelf support is specified for the typical load, environment, and usage of this application.

[Base Cabinets](#)

For this application, shelf support is specified for the typical load, environment, and usage of this application.

Installation Notes

Line-bore the cabinet sides at 32mm spacing using a jig, insert the pins at the chosen height, and seat the shelf. For glass, add the cushioned seat so the pin does not contact the glass directly.

Buying Notes for OEM Orders

For OEM casework, standardize on one pin diameter and the 32mm system hole pattern across the range, and bundle the matching pins with each cabinet kit.
